ATTACHMENT A

AMENDMENT 17 TO TRLIA/MBK CONTRACT Scope of Work

As the TRLIA Program begins to close out the past construction agreements with the State, the focus of management turns from design and permitting to final completion tasks. In addition, recent analysis has identified a risk of flooding from the Goldfields and TRLIA has initiated a four phase program to address this potential flood source. MBK is ready to continue to provide management support and technical services to TRLIA in its mission to provide 200-year flood protection to southwest Yuba County. As a part of implementing the TRLIA program, many permits were obtained which have placed requirements for land acquisition, environmental monitoring and reporting, and interim land management on TRLIA. In addition EIP Funding Agreements require several completion documents to meet the agreement requirements. MBK has extensive program knowledge and has helped to procure many of the permits that TRLIA has acquired for construction. MBK will assist TRLIA in this program completion phase by providing management direction in clarifying ongoing permit requirements and arranging for those requirements to be met. MBK will also assist in the construction of the Yuba Landside Levee Improvement Project that will occur in 2012 and will assist in closeout on the UYLIP and Feather EIP Projects. MBK will also provide hydraulic evaluation of alternatives to address the Goldfields flood risk and assist in management of geotechnical evaluations in the Goldfields and preparation of an alternatives analysis report.
