Re: TRLIA 11th Quarterly Work Plan (QWP), Dated September 14, 2010 & Modification of Overall Work Plan to include Element 9B – Segment 1 V-Ditch Repair

Dear Mr. Zenobia:

Attached is the TRLIA 11th QWP covering the time period October, November, and December 2010.

Additional levee work for Segment 1 has been identified. The additional work is for the repair of a concrete drainage ditch (referred to as V-Ditch) that conveys seepage water from relief wells to RD 784 Pump Station 2. The attached alternative analysis from GEI, Consultants provides details of the problem and potential solutions. Request this work be added to the Overall Feather River EIP Project Work Plan as part of the Segment 1 work and be identified as Element 9B. The attached proposed Modified Overall Work Plan has been modified to reflect this change. Also, the attached 11th Quarter Work Plan incorporates the proposed Element 9B into the 11th quarter anticipated work. There is sufficient funding within the current Funding Agreement to accomplish this work.

Please feel free to contact me if you have questions or comments.

Sincerely,

Paul G. Brunner, P.E.
Executive Director
